SEO Content Engine — Claude Skill

A complete professional SEO workflow skill for Claude. Covers the full pipeline from technical site audits and competitor research to content creation, local SEO, SERP feature targeting, page speed, and international SEO — with four automation scripts included.

What It Does

Feature	Description
🔎 SEO Audit	Full site audit across technical, on-page, content, backlink, and UX pillars
🔍 Keyword Research	Discover 75 high-value keyword opportunities from seed topics
🗺️ Sitemap Analysis	Crawl competitor sitemaps to find content gaps
🏛️ Content Pillars	Build 5 pillars × 10 subpillars for topical authority
✍️ Article Creation	Generate 3,000+ word SEO-optimized articles
🔄 Content Rewriting	Revitalize existing content to recover rankings
🔗 Link Building	Find guest post opportunities and backlink targets
🕸️ Internal Linking	Audit and suggest strategic internal link placement
🏆 SERP Features	Win featured snippets, People Also Ask, and image packs
📍 Local SEO	Google Business Profile, NAP, local citations, and local landing pages
⚡ Core Web Vitals	Fix LCP, CLS, and INP issues impacting rankings
📊 Search Console	Interpret GSC data to find quick wins and diagnose drops
🚀 Site Migration	Protect rankings during redesigns, domain moves, and platform changes
🌍 International SEO	Rank in 52 languages with hreflang and localization

---

Included Scripts

Script	What It Does
`generate_schema.py`	Interactive JSON-LD generator for Article, FAQ, HowTo, LocalBusiness, Product, and Breadcrumb schema
`sitemap_crawler.py`	Crawls any sitemap and outputs a full CSV SEO audit report with severity ratings
`content_brief.py`	Generates a structured content brief for any keyword including headings, LSI keywords, and FAQs
`meta_bulk_generator.py`	Bulk generates optimized title tags and meta descriptions from a CSV of pages

Install dependencies: `pip install requests beautifulsoup4 lxml`

Installation

Claude.ai (web/mobile)

1. Download or clone this repo
2. Zip the `seo-content-engine/` folder
3. Go to **Claude.ai → Settings → Customize → Skills → Upload Skill**
4. Upload the `.zip` file and toggle the skill on

> ⚠️ Upload the `seo-content-engine/` folder itself, not the repo root.

Claude Code (terminal)

```bash
# Clone the repo
git clone https://github.com/your-username/seo-content-engine.git

# Copy skill to your personal Claude skills directory
cp -r seo-content-engine/seo-content-engine ~/.claude/skills/
```

Or using the Vercel skills CLI:

```bash
npx agent-skills-cli add your-username/seo-content-engine/seo-content-engine --agent
```

Usage

Once installed, the skill triggers **automatically** when you mention SEO-related topics.

Example Prompts

```
Help me increase the SEO on my site
```

```
Audit my website: https://mysite.com
```

```
Help me rank for "best project management tools for freelancers"
```

```
Write a 3,000-word SEO article about email marketing for small businesses
```

```
My article on "home office setup" dropped from position 4 to 18. Help me fix it.
```

```
How do I win the featured snippet for "how to start a podcast"?
```

```
Set up local SEO for my restaurant in Austin, TX
```

```
My Core Web Vitals are failing — LCP is 5.2 seconds. How do I fix it?
```

```
I'm migrating from WordPress to Webflow. How do I protect my rankings?
```

```
What does my Google Search Console data mean?
```

Script Examples

```bash
# Generate schema markup for a blog post
python seo-content-engine/scripts/generate_schema.py

# Crawl and audit your full sitemap
python seo-content-engine/scripts/sitemap_crawler.py https://yoursite.com/sitemap.xm

# Create a content brief for a keyword
python seo-content-engine/scripts/content_brief.py "best project management software

# Generate meta tags in bulk (create sample CSV first)
python seo-content-engine/scripts/meta_bulk_generator.py --sample
python seo-content-engine/scripts/meta_bulk_generator.py input.csv
```

Recommended Workflow

```
1. SEO Audit          →  2. Keyword Research   →  3. Content Pillars
        ↓                                                  ↓
6. Internal Linking   ←  5. Link Building       ←  4. Write Articles
        ↓
7. SERP Features  →  8. Local SEO  →  9. Core Web Vitals  →  10. International
```

Requirements

- Claude.ai account (Free, Pro, Max, Team, or Enterprise) with **Code Execution** enabled
- OR Claude Code installed: `npm install -g @anthropic-ai/claude-code`
- Python 3.7+ for scripts: `pip install requests beautifulsoup4 lxml`

No external API keys required.
